

I use XM Radio's traffic and weather frequently and I strongly believe they do a much better and thorough job than the local broadcasters. XM's traffic and weather service is a great advancement in the delivery of pertinent and timely information and they should in no way be hindered in their efforts to provide this service.

I strongly urge you to reject the National Association of Broadcasters' petition 04-160. Let the NAB use technology to provide a better service and not try to stifle others.

Thank you.
